INTERNATIONAL JOURNAL OF MASS SPECTROMETRY AND ION PROCESSES, VOLUME 93 (1989)

SUBJECT INDEX

α,ω-diamines
  evidence of proton-induced cyclization of — from ion mobility measurements, 237
additivity rule
  total electron impact ionization cross-sections of free molecular radicals: a case of failure of the —?, 259
atomization
  — phenomena of metals in a d.c.-spark vacuum discharge, 125

bond dissociation energies
  the gas-phase acidity and — of hydrogen telluride, 87

$C_2H_2D_2$ isomers
  a TPEPICO study of dissociative photoionization of — isomers, 1
carbon cluster ions, $C_n^{+\cdot}$
  properties of — formed by dissociative ionization, 149
$CF_4^{+\cdot}$ ions
  on the stability of — ions, 141
$[CH_3CHOH]^+$
  isotope effects on kinetic energy release. Elimination of CH_4 from — and $[CH_2OCH_3]^+$, 215
$[CH_2OCH_3]^+$
  isotope effects on kinetic energy release. Elimination of CH_4 from $[CH_3CHOH]^+$ and —, 215
CH_4
  isotope effects on kinetic energy release. Elimination of — from $[CH_3CHOH]^+$ and $[CH_2OCH_3]^+$, 215
CO^{2+}
  dissociative electron capture collisions of the diatomic dications — and NO^{2+} with inert gas targets, 339
CO_2^{2+}
  dissociative and non-dissociative single-electron capture by — and OCS^{2+} from rare-gas atoms, 23
comparative Fourier transform–ion cyclotron resonance/tandem mass spectrometry
  organometallic chemistry in the gas phase. A — study, 243
cyclohexane
  transition states of excited polyatomic neutrals studied by their kinetic energy release: —, 49

d.c.-spark vacuum discharge
  atomization phenomena of metals in a —, 125
deprotonated α-amino acids
  collision-induced dissociations of —. The occurrence of specific proton transfers preceding fragmentation, 199
differential translation spectroscopy
  — as a method to study super-excited polyatomic molecules, 309
dissociative electron attachment
  studies of — to some haloethanes using the FALP apparatus: comparisons with data obtained using non-thermal techniques, 15
dissociative electron capture
  — collisions of the diatomic dications CO^{2+} and NO^{2+} with inert gas targets, 339
dissociative ionization
  properties of carbon cluster ions, $C_n^{+\cdot}$, formed by —, 149
dissociative photoionization
  a TPEPICO study of — of $C_2H_2D_2$ isomers, 1
double-focusing mass spectrometers
  — of short path length, 315

electron impact storage ion source
  an — for time-of-flight mass spectrometers, 323
electron scavengers
  the halogens as — in hydrocarbon flames, 115
excited polyatomic neutrals
  transition states of — studied by their kinetic energy release: cyclohexane, 49

FALP
  studies of dissociative electron attachment to

some haloethanes using the — apparatus: comparisons with data obtained using non-thermal techniques, 15
free molecular radicals
total electron impact ionization cross-sections of —: a case of failure of the additivity rule?, 259

gas phase
organometallic chemistry in the —. A comparative Fourier transform–ion cyclotron resonance/tandem mass spectrometry study, 243
gas-phase acidity
the — and bond dissociation energies of hydrogen telluride, 87
gold clusters
mass distributions and geometrical configurations of — $(Au)_n^+$ obtained in a hydrodynamic ion source, 331

haloethanes
studies of dissociative electron attachment to some — using the FALP apparatus: comparisons with data obtained using non-thermal techniques, 15
halogenated hydrocarbons
surface ionization mass spectrometry of organic compounds. III. Hydrocarbons and —, 73
halogens
the — as electron scavengers in hydrocarbon flames, 115
high-precision measurements
— of isotopic fractionation in palladium, 107
hydrocarbon flames
the halogens as electron scavengers in —, 115
hydrocarbons
surface ionization mass spectrometry of organic compounds. III. — and halogenated hydrocarbons, 73
hydrodynamic ion source
mass distributions and geometrical configurations of gold clusters $(Au)_n^+$ obtained in a —, 331
hydrogen telluride
the gas-phase acidity and bond dissociation energies of —, 87

imaging abberations
ion trajectories and — in an imperfectly shaped toroidal energy analyser, 267
imperfectly shaped toroidal energy analyser
ion trajectories and imaging abberations in an —, 267

inert gas targets
dissociative electron capture collisions of the diatomic dications CO^{2+} and NO^{2+} with —, 339
ion mobility
evidence of proton-induced cyclization of α,ω-diamines from — measurements, 237
ion slit lens systems
a computer program for the analytical calculation of potential and electric field in —, 283
ion trajectories
— and imaging abberations in an imperfectly shaped toroidal energy analyser, 267
isotope effects
— on kinetic energy release. Elimination of CH_4 from $[CH_3CHOH]^+$ and $[CH_2OCH_3]^+$, 215
isotopic fractionation
high-precision measurements of — in palladium, 107

kinetic energy release
transition states of excited polyatomic neutrals studied by their —: cyclohexane, 49

LiCl
isotope effects in thermal ionization of —, 303

mass selective ion rejection
a technique for — in a quadrupole reaction chamber, 225
MC_5H_5 (M = Fe, Co, Ni)
formation and detection of neutral half-sandwich complexes — using neutralization–reionization mass spectrometry (NRMS), 177

neutral half-sandwich complexes
formation and detection of — MC_5H_5 (M = Fe, Co, Ni) using neutralization-reionization mass spectrometry (NRMS), 177
NO^{2+}
dissociative electron capture collisions of the diatomic dications CO^{2+} and — with inert gas targets, 339
non-thermal techniques
studies of dissociative electron attachment to some haloethanes using the FALP apparatus: comparisons with data obtained using —, 15
NRMS
formation and detection of neutral half-sandwich complexes MC_5H_5 (M = Fe, Co,

Ni) using neutralization-reionization mass spectrometry (—), 117

OCS^{2+}
Dissociative and non-dissociative single-electron capture by CO_2^{2+} and — from rare-gas atoms, 23
octopole guide
transport of an ion beam through an — operating in the r.f.-only mode, 95

palladium
high-precision measurements of isotopic fractionation in —, 107
$Ph–C_3H_6^+$
gaseous isomeric — ions: a radiolytic and mass spectrometric study, 185
proton affinity
the application of a selected-ion flow drift tube to the determination of — differences, 165
proton transfers
collision-induced dissociations of deprotonated α-amino acids. The occurrence of specific — preceding fragmentation, 199
proton-induced cyclization
evidence of — of α,ω-diamines from ion mobility measurements, 237

r.f.-only mode
transport of an ion beam through an octopole guide operating in the —, 95

selected-ion flow drift tube
the application of a — to the determination of proton affinity differences, 165
short path length
double-focusing mass spectrometers of —, 315
single-electron capture
dissociative and non-dissociative — by CO_2^{2+} and OCS^{2+} from rare-gas atoms, 23
super-excited polyatomic molecules
differential translational spectroscopy as a method to study —, 309
surface ionization mass spectrometry
— of organic compounds. III. Hydrocarbons and halogenated hydrocarbons, 73

thermal ionization
isotope effects in — of LiCl, 303
time-of-flight mass spectrometers
an electron impact storage ion source for —, 323
TPEPICO
a — study of dissociative photoionization of $C_2H_2D_2$ isomers, 1
transition states
— of excited polyatomic neutrals studied by their kinetic energy release: cyclohexane, 49
